The logo for Clear.bio, featuring the word "Clear." in a bold, red, sans-serif font.

Contact

Name	Piet Hein van Dam
Role	CEO & founder

Description

Clear.bio is a digital self help tool for diabetes 2 patients (the fastest growing chronic disease). It's based on precision nutrition. With a real-time sensor, a smart app and a real dietician we help participants to find out their personalised diet. Within 3 months, 25% of the newly diagnosed patients has fully reverted their disease and 50% is able to reduce their medication significantly. Clear.bio is a so called pDTx: prescription digital therapeutic.

Dovideq Medical Systems bv

Company (SME)

Country	Netherlands
City	Deventer
Street	Munsterstraat 18
Web	http://dovideqmedical.com

Contact

Name	Evert Alink
Role	Sales & Marketing Director

Description

Dovideq develops automated testing systems, so hospitals can prove that their endoscopes are safe and fit for purpose.

All of our systems are interconnected, so data streams to our cloud platform, where we can provide stakeholders with vital quality information, increasing traceability, predictability and lowering OR downtimes.

Dovideq saves an average regional hospital € 100,000.- per year in lost OR days alone and 25% in endoscope repairs.

Areas of Activity

- Other

Marketplace Opportunities

PRODUCT

LightControl

Automated Rigid Endoscope testing system.

100% brand and type agnostic. Checks 6 vital quality parameters within 1 minute.

Connects to endoscopemanager.com for reporting and analysis.

Lowers OR downtimes with 3 days, saves 25% in cost of repairs and increases lifespan by 20%.

Increases predictability and traceability.

PRODUCT

GuideControl

Intelligent light guide cable tester
specifically designed for the Central Sterilization Department.

It objectively verifies the quality of light guide cables based on 3 parameters within 10 seconds. 100% brand and type agnostic. No adaptors needed

All your test reports are automatically saved to endoscopemanager.com for compliant reporting.

PRODUCT

LeakControl

Automated, repeatable electronic air leak test
that finds leaks early on when repairs are minor and less costly, minimizing the level of damage caused by submersion.

Saves 90% of repairs.

PRODUCT

DoviScan

Intelligent data matrix scanner
Reliable scanning of small 2D datamatrix codes used on any medical instrument.
It connects to any software that you use.
Innovate on the fly. Make less mistakes.

Shock proof casing, dust tight and splash-water resistant to make cleaning fast and easy.

PRODUCT

DoviRead

Smart and compact RFID and NFC tag reader that can be used for any application. Specifically designed for medical use.

PROJECT COOPERATION

Pilot Project Hospitals - verification of procedures and benefits for France

Our rigid endoscope testing system has been validated and verified for efficacy by the Hospices Civils Lyon.

They found out that 80% of defects are not even seen by a surgeon before the minimally invasive surgery starts.

Broken scopes alone cause 3 full OR days of delays and cancellations per year that can be saved. Because our devices see a lot more than humans, we can save 25% of annual repair costs and an increase of 20% in endoscope lifespan.

We're looking for a French hospital where we can gain more experience with specific regional procedures in the central sterilisation department and biomedical engineering and with whom we can write a business case.

The hospital will gain a lot of insights in quality, usage and predictability.

EXPERTISE

Database with 2 million images through endoscope interior lenses and

3.000.000 parameters datapoints from 500.000 tests.

Our endoscopemanager.com platform has aggregated a database with 2 million images of endoscope lenses and 3.000.000 datapoints from 500.000 tests.

We can tell hospitals, OEMs and repair companies a lot that could be used in post-clinical studies.

Heffels Spiegeler Advocaten

Company (Industry)

Country	Netherlands
